THE BATTLE OF YENI SASHA.

The following interesting account of the battle of Yen Sash is contained in a private letter from Mr. Stephen, the artist of the *Illustrated London News*, whose kindness to the wounded was recently referred to by our military correspondent.

"I have a little time to write a few lines to show you I am well and alive, but when I fall you for the past ten days I have not stopped long enough in any place to have my feet set to work to write. I am not able to do so now, as I understand my silence. For six days I have not had my clothes off, and have been in the open air without even a tent at night, and next to nothing to eat except bread which we have to break with a stone. On Sunday morning last week Ross (the correspondent for the *Scotsman*) and Mr. Carrick, a St. Patrician doctor, and I made our way through the ruined town of Gombol and his dying column from Kossak. We were the only correspondents with this advanced force, much to our delight, and I had a clear field for the first time. Our object was to cross the lower Balkans and sweep Yen Sash and Eski Sash, meeting another column on our way. Well, we rode on through burning villages, through the long hot day with the Staff, and we were well received, as they were very well satisfied we were more勇敢 than our adventurous expedition.

"The way lay through a lovely valley, rich with maize and corn, and for the most part beside a very pleasant little river, the Tandja, stopping beside it for a couple of hours to bathe in the heat of the day; then out on into the night. The poor Infirmary men had no time to stop, and had to load and boil the wounded for the Turks until the horses were fit again, and with slight I embraced my horse and fell rich again, and rewarded the poor fellows handsomely. The three horses had gone for a walk at the word, the bushes closing behind them had effectively concealing their retreat.

"Night closed in, and the moon was up.

EXTRACTS.

DESPOTY.

The thoughts that rain their steady flow
Lie stirs on life's cold east.

What else know, or say they know
They never shone for me.

Thoughts light, like gleams, my spirit's sky,
But they will not remain;

They light me once—they hurry by—
And never come again.

—Poems. —Matthew Arnold.

MOON AND DAWN.

The bright stars—the graves blue,
Where golden gleaming stars are set;

A moon whose glorious robes unites
Made fair the rippled river.

Night has her own train over all;

The fair show dark agains the sky.

The copy sound is in the song

Of safe nightingsale's close by.

The wood'd walk which seemed so sweet,

Seen in the morning's fairy light,

Now dim and shadowy hold no charm.

Save the mysterious charm of night.

One swallow flies, the gold stars fade,

In the cold sky a chill wind wakes;

The gray clouds brighten out the moon,

And they pale out the new day breaks.

Good-night—good-night—which in the last

God grace, some day, that I may find

Both true, good men to joy begin,

Good night to sorrows left behind.

—Public Opinion.

TIRED.

"Pa," said one particularly bright dame in Lexington Avenue one morning, as she looked up suddenly from her piano, as if a happy thought had struck her. "Pa, I think I'll get married this afternoon!" Horror-stricken, the parent staggered to the door to call the household. "Calm yourself, she said, waving: "I'm in my right mind. I must get married or go on the stage. I've played all of Chopin's waltzes. I'm tired of fooling with the whale at the aquarium. There are only two things left to choose from, matrimony or mimicry." —*Spirit of the Times.*

LA IN MONTENEGRO.

If a man wishes to sell his real property, his house, fields, vineyard, or forest ground—he must first offer it in the presence of witnesses to his relatives; if these are unwilling to purchase, he must then offer it to his nearest neighbours, and only on their refusal can he put it up to public sale; the relatives or the neighbours are, however, not to take advantage of this law to the detriment of the seller. If they purchase they are to do so at the same price which others are willing to give, since it is to be offered at a fixed valuation. As markets are instituted for the good of the people, no one may disturb the peace at such places any more than they would quench a church, and those who commence or excite disturbances in either market or church are to be similarly punished. Injury to the person is assessed according to the members injured, and the aggressor is required in addition to pay all costs incurred in the cure of the wounded man. A blow by hand, foot, or pipe, may be avenged by killing the aggressor; but if the injured person allows a day or two to elapse and then kills his opponent, he is guilty of murder. All brigandage on the Turkish frontier is forbidden in time of peace or during a truce, and in case of breach of this law the booty is to be restored and the criminal punished. The son or daughter who treats either parent with disrespect is for the first offence to be fined, for the second to be imprisoned and flogged, for the third, the father is at liberty to turn the offender out of the house and to deprive him or her of all the rights of a child. —*Montenegro, its People and their History.* By the Rev. W. Denyer, M.A.

HANDEL'S FIREWORK MUSIC.

Han'del's water-music is well known and occasionally revived, but his firework music has fallen into neglect, which it scarcely deserves at the hands of the admirers of that great master. It is a spirited and effective composition, admirably suited to the purpose it was intended to serve, i.e., to accompany the grand display of fireworks in the Green Park, celebrating the peace of Aix-la-Chapelle, April 27th, 1748. On that occasion England, France, and Holland met with each other in their pyrotechnic displays, and the first-named country surpassed its continental neighbours in one respect by employing the greatest musician of the day to write the accompanying music. A long correspondence has been preserved among the State papers respecting the preparations, part of it appertaining to the music. Han'del was not an easy person to manage in matters of duty, and difficulties did arise. In the first place, the King's consent for Han'del to compose the music was not easily obtained, and, when granted, it was with the express understanding that it should be of a martial character. This appears not to have been the view of the great composer. The Duke of Montagu, Master-General of the Ordnance, thus writes on the 23rd March:—"I don't see any kind of objection to the removal of the music at Vauxhall being advertised, and when that is done, many questions are asked how it comes to be there, the true reason must be given. I think Han'del now proposes to have but two trumpets, and twelve French horns; at first, there was to have been 16 of each, and I remember I told the King so, which at that time objected to there being any music; but when I told him the quantity and number of martial instruments was to be, he was better satisfied, and said he hoped there would be no objection. Now Han'del proposes to lessen the number of trumpets, &c., and to have violins. Any other I am sure will put him out of humour; therefore I am sure it behoves Han'del to have as many trumpets and other martial instruments as possible; he don't trench on the violins, and I think he should; the I believe he will have to be persuaded to do it. I mention this, as I have very lately been told, from very good authority, that the King has within the fortifications expressed himself to this purpose." The differences seemed to relate to such a column as would cause Han'del's music to be "about" all doubt but when the King has it he will be very much displeased. If the thing was to be in such a manner as certainly to please the King, it ought to consist of no kind of instrument but martial instruments. Any other I am sure will put him out of humour; therefore I am sure it behoves Han'del to have as many trumpets and other martial instruments as possible; he don't trench on the violins, and I think he should; the I believe he will have to be persuaded to do it. I mention this, as I have very lately been told, from very good authority, that the King has within the fortifications expressed himself to this purpose." The differences seemed to relate to such a column as would cause Han'del's music to be "about" all doubt but when the King has it he will be very much displeased. The differences seemed to relate to such a column as would cause Han'del's music to be "about" all doubt but when the King has it he will be very much displeased. If the thing was to be in such a manner as certainly to please the King, it ought to consist of no kind of instrument but martial instruments. Any other I am sure will put him out of humour; therefore I am sure it behoves Han'del to have as many trumpets and other martial instruments as possible; he don't trench on the violins, and I think he should; the I believe he will have to be persuaded to do it. I mention this, as I have very lately been told, from very good authority, that the King has within the fortifications expressed himself to this purpose." The differences seemed to relate to such a column as would cause Han'del's music to be "about" all doubt but when the King has it he will be very much displeased.
